

STARTER

© Zoran Bijač, 2016.

Starter is an alphanumerical high range IQ test. Digits 0 – 9 and letters of the English alphabet (a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z) can be used.

The correct solution of each task will be reached only if strict and accurate logic is applied in the whole given sequence. There is no time limit to this test, take as much time as you need.

Every correct solution brings you 1 point. You can check current **score list and norm**.

For the time being there is no fee, testing is free of charge. Two attempts are allowed.

Please, do not discuss, share or publish solutions at any time with anyone.

Note: digits in the brackets after the decimal separator are the digits denoting fractional part of the number infinitely repeating i.e. $1.(2345)$ means $1.234523452345\dots$

I hope you will have fun and enjoy yourselves!
